

TUBES FOR CONSTRUCTIONS

SEAMLESS TUBES

The round **SEAMLESS** tubes are hot rolled and satisfy both the requirements of the norm EN 10210 for structural applications and EN 10297-1 for mechanical applications. These steel tubes are fully killed and are suitable for structural applications but with the possibility to reach up to 120 mm w.t., which is impossible for welded tubes.

APPLICATIONS

These tubes are used for the manufacture of various kinds of construction components, above all where heavy w.t. are required.

NORMS

EN 10210-1/2 (structural applications)

EN 10297-1 (mechanical applications)
