

COLD DRAWN CYLINDER TUBES INSIDE H8

Our standard stock includes cold drawn tubes, both **SEAMLESS** and **WELDED**, with machined ID according to tolerance H8 EN 20286 and roughness (Ra) below 0.4 micron (μm).

GENERAL FEATURES

Chemical and mechanical features are the same of the raw tube (see steels-table for cold drawn tubes suitable for honing), which is machined on the ID. The dimensional tolerances are the same of the raw tube, except for the ID, which is according to H8.

NORMS

COLD DRAWN SEAMLESS TUBES
COLD DRAWN WELDED TUBES
DIMENSIONAL FEATURES OF THE ID
